

ABHIPSITA DASGUPTA

+91-9002239990 | adasgupta.official@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Professional Summary

Early-career analyst with a B.Tech engineering foundation (CGPA 8.66) and demonstrated experience in data-driven problem solving, structured research, and stakeholder reporting. Skilled in translating complex datasets into clear, actionable insights using Excel, SQL, and Power BI, with a track record of delivering polished work product — dashboards, models, and written documentation — that supports strategic decision-making. Adept at managing multiple workstreams with precision and communicating findings effectively to diverse audiences. Motivated by intellectually demanding challenges and committed to rigorous, evidence-based recommendations.

Technical Skills

Analytics & Methods: Data Analysis, Root Cause Analysis, Statistical Reasoning, KPI Reporting, ETL, Dimensional Modelling, Segmentation, Process Improvement

Tools & Platforms: Advanced Excel (PivotTables, Power Query, XLOOKUP, VLOOKUP, Macros), Microsoft Office 365 (PowerPoint, Word), SharePoint, Google Sheets, Google Cloud Platform (BigQuery)

Visualization & Reporting: Power BI (Dashboard Development, Star/Snowflake Schema), Tableau

Programming & Query Languages: SQL (MySQL, BigQuery), Python (Pandas, NumPy, Matplotlib), DAX

Projects

E-Commerce Sales Performance Analysis | *Excel, Power Query, ETL, PivotTables, XLOOKUP* | [GitHub](#)

- Analysed over 15,000 customer and sales records to optimise regional marketing spend through segmentation and performance analysis.
- Cleaned and integrated multi-sheet datasets using Power Query and advanced Excel functions, reducing data entry errors by 45% and improving targeting accuracy by 25%.
- Built KPI-driven dashboards and region-wise performance reports across 8 territories, enabling data-backed initiatives that increased customer engagement by 15%.

Stock Market Trend & Financial Transaction Analysis | *SQL, Power BI, DAX, MySQL* | [GitHub](#) | [Dashboard](#)

- Engineered ETL pipelines acquiring and processing 200,000 trading records in MySQL, applying dimensional modelling (Star Schema) to structure fact/dimension tables — accelerating query performance by 40% through index tuning and optimized joins.
- Designed and developed Power BI dashboards with DAX measures tracking liquidity, seasonality, and volatility KPIs; improved insight turnaround time by 40% and pattern detection accuracy by 30%.
- Implemented data quality validation routines to flag anomalies across time-series data, ensuring 99% accuracy in analytical outputs consumed by investment strategy decisions.

Customer Behavior & Capital Spend Analysis | *Python, Power BI, pandas, NumPy, DAX* | [GitHub](#) | [Dashboard](#)

- Acquired and processed 35,000+ customer transaction records using Python-based clustering to identify 6 behavioral segments; curated findings into a Star Schema-aligned data model for Power BI consumption.
- Developed dashboards tracking spend behavior, credit utilization, and customer lifetime value KPIs — enabling proactive risk management and targeted retention strategies aligned with alternative assets reporting frameworks.
- Integrated Gen AI tools for BI optimization, leveraging AI-assisted pattern summarization to surface actionable insights from high-cardinality behavioral data 30% faster than manual analysis.

Technical Training

Data Analyst Intern

August 2024 – February 2025

Unified Mentor Pvt. Ltd.

Remote, India

- Acquired, cleansed, and validated 50,000+ monthly records using SQL and Excel, resolving 150+ data inconsistencies per month and sustaining 99% data accuracy in compliance and operational analytics reporting.
- Developed and automated Power BI dashboards tracking critical business KPIs in collaboration with cross-functional stakeholders, cutting manual reporting effort by 30% through reusable, templated report structures.
- Translated raw operational data into insight-driven outputs through end-to-end data preparation and analysis; documented analytics requirements and quality standards to ensure solutions met defined business and compliance objectives
- Communicated findings through structured written deliverables and status updates, enabling data-driven decisions across business and operations teams — demonstrating clear, audience-adapted reporting.

Education

Maulana Abul Kalam Azad University of Technology

West Bengal, India

Bachelor of Technology in Mechanical Engineering | **CGPA: 8.66/10**

2022

- Relevant Coursework:** Statistics, Operations Research, Data Analysis, Quantitative Methods

Certifications

Complete Data Science Bootcamp 2025 — Udemy | **Google Advanced Data Analytics Professional Certificate**
— Coursera | **Google Data Analytics Professional Certificate** — Coursera

Key Achievements

- Validated and quality-checked 260,000+ records across training and projects, maintaining a sustained 99% data accuracy rate throughout all deliverables.
- Delivered recurring BI reports and analytical outputs with zero escalations, adhering strictly to defined documentation standards, data controls, and project timelines.
- Designed and executed ETL workflows processing data from diverse sources, improving data consistency and reducing downstream data defect rates by over 45%.
